

Final Assignment Proposal Quantum Leaps - Dr. J. Mior

Select a scientist (or a theory) we studied in class and briefly explain why you chose this scientist or topic for your presentation. You may select a scientist or theory that we did not discuss in class. However, you must seek prior approval for your choice.

The write-up may be brief. You are asked to make this selection now so that you will have the rest of the semester to do your research and your preparation. Your write up will be submitted to me in Week Nine (9). I will review your proposal and return it to you as quickly as possible.

Your proposal will be word process and submitted with a proper title page.
