

# Quantum Leap Portfolio Summary F2011

## Dr. Joe Mior

### Portfolios

During the semester, in addition to the lectures, there will be numerous discussions and film viewings designated for inclusion in each student portfolio. These assignments provide an opportunity for students to integrate knowledge acquired in the course. There will be **NO** opportunity to complete or make up these portfolio assignments outside the class schedule.

### Format

Each student is required to submit the portfolios (with a word processed title page) on specific dates announced in class. Specific details for submission will be reviewed just before Portfolios are due.

### Evaluation

The marks given for the portfolio are based on completeness and quality of the submission. Further detailed instructions regarding exactly how the portfolios are to be submitted will be discussed in class.
